An unfortunate affair occurred in this city Saturday night in which Dr. Guilford was quite severely injured by being struck or cut on the head. The wound required six stitches to close. The Doctor was unable to be at his office Sunday or Monday but was able to be out Tuesday afternoon. It seems hard to get the facts in the case as there are many conflicting stories in regard to the affair. However, there was a fight of some kind and one George Solan is under bond charged with assault. Of course there are many stories leading up to the difficulty but we refrain from trying to give a detailed account of it, in view of the fact that the case is to be aired in the courts where the facts can be brought out.

## What the People Pay.

The people of the United States pay a subsidy, in artificially high prices, to the wool industry, of at least \$104,000,000 a year, according to the calculations of Hon. Oscar W. Underwood of Alabama, chairman of the Ways and Means Committee of the House of Representatives.

"The Payne-Aldrich tax of 61 cents per yard, to say nothing of any increase in tax as it passes to the jobber, makes not less than \$104,000,000 paid each year to subsidize the wool industry of America" says Mr. Underwood. "Now, the entire duties actually paid the United States on all imports of woollens and worsted in 1910 amounted to less than \$15,000,000, which means that or \$104,000,000 extorted from the consumers of woollens nearly \$90,000,000 went to the wool interests.

"Is it fair or just or right to maintain these enormous taxes unduly to foster the business of less than one-fourth of one per cent of the people and to require ninety-nine and three-fourths per cent to stagger under this enormous burden? I for one do not believe the American people will justify the President in his veto of the wool schedule."
